The Big Ideas

1. How It Works.
2. How You Make Money.
3. How We Implement.
4. Who We Are.

Unomobi

The logo for Unomobi features the company name in a sans-serif font. The 'o' in 'mobi' is stylized as a cluster of small dots, and the 'i' has a dot above it. This dot pattern extends into a larger, star-like shape behind the text.

1. How It Works.

UnoMobi is a unique one source push Email to SMS solution, carrier tested, and ready to go, immediately!

Unomobi

simple to use...

easy as SMS!

Unomobi

UnoMobi... Email to SMS

how it works.

Combines the simplicity of SMS with the functionality of Email allowing 100% of your subscribers to send, receive, reply and forward emails from up to five POP3 accounts with SMS, through a clientless WAP/Web user experience.

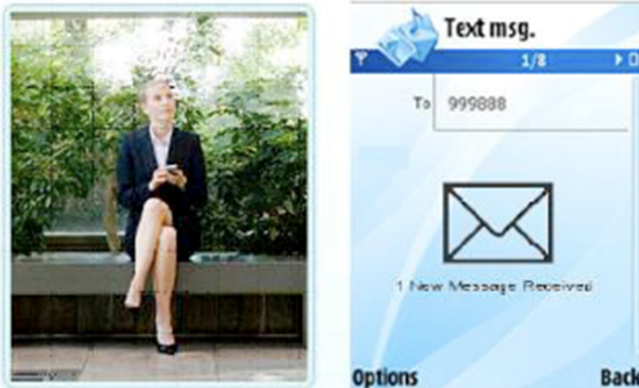

UnoMobi... **how it works when**

1. The subscriber does not have WEB/WAP
2. The subscriber has WEB/WAP

UnoMobi... no WEB/WAP

1. Receive SMS notification

2. Read email (via SMS)

3. Reply to email

- Email • to • SMS is a simple and easy way to receive email for anyone with a mobile phone.
- Receive SMS notification.
- Read & reply to email via SMS, or listen to voice message play back.

UnoMobi... with WEB/WAP

- User receives an SMS notification in their SMS inbox.
- Recipient opens SMS message to read summary.
- She decides to read the entire email and clicks/selects the embedded hyperlink, opening the WAP/XHTML browser to read the full message.
- She can also view any associated attachment of any size or format in a highly optimized manner.
- Optionally she can reply, reply all, forward, delete, and check her inbox.

2. How You Make Money.

UnoMobi provides a one source mobile messaging application that adapts to any global market - building loyalty and generating revenue now!

The logo for UnoMobi, featuring the word "UnoMobi" in a white sans-serif font. The letter "o" in "Mobi" is stylized as a cluster of small white dots. The background of the logo area is a dark blue gradient with a pattern of small, light blue dots.

UnoMobi... revenue models

1. **Subscription.**
2. **Subscription + SMS mobile advertising.**
3. **Increased SMS, Data, and Voice traffic.**

UnoMobi... example revenue model

	Monthly Revenues Y1	Monthly Revenues Y2
Subscribers	1 MM	1.3 MM
Subscription Revenue \$0.99/mo	\$1 MM	\$1.3 MM
Advertising Revenue 400 per mo/user; \$10 CPM; 15% sellout rate \$0.6 MM	\$0.6 MM	\$0.9 MM
TOTAL REVENUE	\$1.6 MM	\$2.2 MM
ARPU Increase	\$1.60	\$2.00

UnoMobi... carrier benefits

- 1. Increased ARPU.**
- 2. Increased Customer Loyalty.**
- 3. Churn Mitigation.**

3. How we Implement.

UnoMobi provides a one source mobile messaging application that seamlessly integrates within any network, with limited operator involvement.

The logo for UnoMobi, featuring the word "UnoMobi" in a white sans-serif font. The letter "o" in "Mobi" is replaced by a cluster of small white dots, resembling a starburst or a network of nodes. The background of the slide is a dark blue gradient with a subtle pattern of small white dots.

UnoMobi... validation

consumer mobile Email is poised for growth

Mass market mobile email is still in its infancy, but poised to explode from a base of 20MM users today to 350MM users by 2010.*

This represents 20% of all email accounts.*

Consumers who do have mobile email spend more time using it than almost all other mobile applications available to them in the market.

Customers want mobile email today, but what is preventing mass adoption?

UnoMobi... adoption issues

adoption of mass-market consumer mobile email has been a problem due to:

Smartphone cost/availability*:

- 14% of 2008 shipments.
- < 4% of installed base.
- MAY account for up to 40% of global user base by 2015.

Data/eMail enabled phones**:

- Feature phone ~ 50% of installed base.
- WAP/data connected ~ 50% of feature phones.
- Net: 3B out of 4B phones cannot support email.
- Low cost, basic phones are predominate in emerging markets.
- Basic phones will likely be the only web/internet access method for many emerging markets for years to come.

Among those that do have capable devices, many are unable or hesitant to load another application on their mobile device – the 5% cap, find it too complex to use, or just too expensive.

SMS is the simplest and most widely used mobile messaging protocol in the world, though it is not yet feature rich. How do we provide a simple yet feature rich mobile email service that will be as widely adopted by consumers as SMS?

* Analyst reports and company estimates. ** Varies based on market, carrier and handset vendor.
